

## Technical Skills

**Strong:** HTML5 | CSS3 | Bootstrap | SASS | JavaScript | jQuery | ES6

**Proficient:** React.js | Redux | Node.js | PHP | SQL | Drupal 8 | GitHub

## Web Applications

### **DayMakr** [Live](#) / Github

*A day planner that picks the top 3 places to eat and the top 3 activities to do in the city of your choice.*

- Created service to pull data from the Yelp, Google Maps & Weather API
- Built UI allowing user to select from destinations, restaurants, and activities
- Structured and styled app using modern HTML5 and CSS3 techniques

### **Memory Match** [Live](#) / Github

*A Teen Titan themed card-matching game for children of all ages.*

- Added a responsive field that tracks a player's accuracy, guesses, and statistics.
- Used HTML to structure the basic game skeleton and applied CSS & Bootstrap to style the aesthetic portion
- Constructed game logic, card randomization, animation states & sound effects using Javascript & jQuery

### **League of Boatwrights** [Live](#)

*A website dedicated to small boat enthusiasts passionate about boat-building.*

- Utilized the Drupal 8 CMS to provide resources on boats for boatwrights(boat-builders).
- Created functionality that filters & sorts through the database and displays what was requested
- Customized site with modules and built site structure by using content types, blocks & views.

### **Bookswopp** (currently in progress)

*An online book swapping community for parents with bookshelves filled with books their kids no longer have an interest in.*

- A web-app to be built with **React.js** & **Node.js**

## Experiences

### **Olivet International** (Los Angeles, California)

*Quality Assurance Team Lead*

2015 – 2016

- Led design team & sales team to improve the aesthetics and functionality of end product

### **Times International Language Center** (Taipei, Taiwan)

*Business English Teacher / Consultant*

2006 – 2015

- Designed new curriculums and testing standards resulting in 20% more students on the waiting list.
