

Technical Skills

Strong: HTML5 | CSS3 | Bootstrap | SASS | JavaScript | jQuery | ES6

Proficient: React.js | Redux | Node.js | PHP | SQL | Drupal 8 | GitHub

Web Applications

Bookswopp (currently in progress / will be omitted until complete)

An online book swapping community for parents with bookshelves filled with books their kids no longer have an interest in.

- A web-app to be built with React.js

League of Boatwrights johntylermoon.com/league/

A website dedicated to small boat enthusiasts passionate about boat-building.

- A site built with Drupal 8 that provides resources on boats for boatwrights(boat-builders).
- Created functionality that filters & sorts through the database and displays what was requested
- Customized site with modules and built site structure by using content types, blocks & views.

DayMakr Live / Github

A day planner that picks the top 3 places to eat and the top 3 activities to do in the city of your choice.

- Pulls data from the Yelp, Google Maps & Weather API and displays content according to the user's input.
- Served as a front-end dev utilizing HTML 5 / CSS 3 to provide structure and style for the user
- Implemented the weather API through AJAX calls

Memory Match Live / Github

A Teen Titan themed card-matching game for children of all ages.

- A card game with a responsive field that tracks a player's accuracy, guesses, and statistics.
- Utilized HTML to structure the basic game skeleton and used CSS to style the aesthetic portion
- Combined Javascript & jQuery to provide game logic, card randomization, animation states & sound effects.

Experiences

Olivet International (Los Angeles, California)
